

JSTRIP-12-3

Stripping tool for high speed grounding kit GKSPEED-12 series

The JSTRIP-XXX-X is a precision tool designed specifically for stripping CELLFLEX coaxial cables to install GKSPEED20-XXX cable groundings. Engineered for speed and accuracy, this tool enables quick cable preparation without damaging the copper outer conductor, ensuring reliable and consistent performance.

Its compact and ergonomic design makes it ideal for use in tight cable bundles or confined spaces, allowing technicians to work efficiently even in challenging installations. With its simple yet robust construction, the JSTRIP-XXX-X offers exceptional user-friendliness, reducing effort and minimizing the risk of errors during the stripping process.

Features / Benefits

- Precision Stripping**
Quickly removes cable jacket without damaging the copper outer conductor, ensuring reliable grounding installation.
- Compact Design**
Perfect for use in tight spaces and dense cable bundles, improving accessibility and efficiency.
- User-Friendly Operation**
Simple design allows easy handling and intuitive use, minimizing training requirements.
- Durable Construction**
Built for repeated use, providing long-term reliability and consistent performance in field applications.

Technical Features

PRODUCT INFORMATION

Size	1/2"
Cable Type	LCF12-50J LCF12-50JFN
Grounding Kit	GKSPEED20-12P
Type of Tool	Stripping tool for high speed grounding kit GKSPEED-XXX series
Material	Stainless Steel
Package Quantity	1
